Saving Energy Starts Here 

An energy efficiency newsletter for Newfoundland and Labrador

October 2009

## Get Ready for Winter

**takeCHARGE Newfoundland and Labrador!**  
**Saving Energy Starts Here!**

Winter's on the way! Now's the time of year to make sure you're ready to keep the heat in and the cold out.

Making smart energy choices and changes in your home today can save you money all year, but there's no time when the savings add up as much as during the colder winter months. Now is the perfect time to look for opportunities to make your home more comfortable, and save energy and money this heating season.

takeCHARGE Energy Savers Rebate Programs give you money back when you upgrade the basement and attic insulation in your home, buy ENERGY STAR<sup>®</sup> programmable thermostats, or install ENERGY STAR qualified windows. These rebates are available if electricity is your primary source of heat.

### Here's how you can SAVE

- ⊕ **Basement and crawl space insulation** - Get \$0.24 per square foot back for R-12 or more!
- ⊕ **Attic insulation** - Get \$0.20 per square foot back for R-20 or more!
- ⊕ **ENERGY STAR programmable thermostats** - Get \$10 back!
- ⊕ **Electronic high performance thermostats** - Get \$5 back!
- ⊕ **ENERGY STAR qualified windows** - Get \$2 back per square foot!

# Get money back with Energy Savers Rebates
