

## Become more energy efficient at home and save money all-year round!

- Caulk and weather strip around doors, windows and attic hatches.
- Seal gaps where phone, cable and electrical wires enter your home.
- Use foam gaskets behind electric switches and outlets.
- Upgrade the insulation in your basement or crawl space to a minimum of R-12, and your attic to R-32. Get money back with the takeCHARGE Energy Savers Rebate Program.
- Install programmable thermostats to automatically set back temperature at night or when you are away from home. takeCHARGE offers rebates for programmable and electronic thermostats.
- Install ENERGY STAR® windows in your home and get money back with the takeCHARGE Energy Savers Rebate Program.
